G. Don

Don, George (1798-1856)

British plant collector and nurseryman, brother of David Don.

Hall.f.

Hallier, Hans (Johannes) Gottfried (1868-1932)

German botanist who collected in Indonesia and the Philippines and who settled ultimately (Nov. 1908) at Leiden; son of Ernst Hallier.

Jacq.

Jacquin, Nicolaus Joseph, Baron von (1727-1817)

Dutch born Austrian botanist; to Paris 1750-1752; from 1752 in Austria; to the West Indies 1755-1759; at Schemnitz 1763-1769; from 1769 professor of botany and chemistry at the University of Vienna;

enobled 1806.

Linn.

Linnaeus, Carl (1707-1778)

Swedish botanist, physician and zoologist; Dr.med.Harderwijk 1753; in the Netherlands 1735-1738, for the greater part of the times as physician to George Clifford at the Hartecamp near Haarlem; from 1738-1741 practicing physician at Stockholm; professor of medicine and botany at Upsala 1741-1778, founder of modern plant systematics and nomenclature.

Linn.f.

Linne', Carl von, filius (1741-1783)

Swedish botanist; studied at Upsala, Dr.med. 1765, professor of medicine and botany ib.1777-1783.

S. Manso

Manso, Antonio Luiz Patrício da Silva (1788-1848)

Brazilian botanist, physician and politician, from 1823 practicing medicine in Cuiaba, Matto Grosso; representative of Matto Grosso in Brazilian parliament 1834-1837; later living in his native town Campinas.

Ooststr.

Ooststroom, Simon Jan van (1906-X)

Dutch botanist; Dr.Phil. Utrecht 1934; assistant at the Botanical Museum Utrecht 1927-1934; from 1934 in various function at the Rijksherbarium, Leiden.

APPENDIX II

THE ORIGIN AND MEANING OF SOME GENERIC NAME AND SOME SPECIFIC EPITHET

ANISEIA Choisy.

(Greek - anisos = unequal , refer to the sepal being unequal.)

- martinicensis (Jacq.) Choisy

(Martinique = name of the island in Caribbean sea , West Indies + ensis - Latin suffix = indicates country or place of growth or origin , refer to the first discovering or the origin of this species is in Martinique)

DONAMIA Thou.

- semidigyna (Roxb.) Hall.f.

(Latin - semi = half + Greek - di = two + Greek - gyn = female , refer to the pistil of this species composed of two carpels which cohere at the portion of ovary only , 2 style and 2 stigma)

CUSCUTA Linn.

(New latin - cuscut ; Arabic - cochout = dodder , refer to the common name of Cuscuta)

- chinensis Lamk.

(China + ensis = related to China , refer to the first discovering of this species in China or the origin of this species is in China)

- reflexa Roxb.

(reflexus = reflexed , bent abruptly backwards at more than 90° , refer to the corolla lobe suddenly bent backwards)

EVOLVULUS Linn.

(Latin - evolvo = to unroll , refer to stem ascending or erect not rolled)

- alsinoides (Linn.) Linn.

(Alsine = the generic name of Alsinaceae but now change into Caryophyllaceae and the name Alsine was rejected but used as the subfamily name, Alsinoidea + oides - latin suffix = resembling, refer to this species resembling with Alsine.)

- nummularius (Linn.) Linn.

(Latin - nummularius = rounded and flat like a coin, refer to the leaves of this species like a coin.)

HEWITTIA Wight & Arn.

- scandens (Milne) Mabberley

(Latin - scandens = climbing, refer to the climbing habit of this species.)

JACQUEMONTIA Choisy

(Honor commemorative name has been given to Victor Jacquemont)

- paniculata (Burm.f.) Hall.f.

(Latin - panicl = a tuft ; panicle)

- pentantha (Jacq.) G. Don

(Latin - penta = five + Anther , refer to five stamens.)

MERREMPIA Dennstedt.

- bambusetorum Kerr

(bambus = bamboo + etorum = denoting in ecology a plant community , refer to this species grow in bamboo forest)

- collina S.Y. Liou

(Latin - collinus = pertaining to hills.)

- emarginata (Burm.f.) Hall.f.

(Latin - emarginat = without a hem or border , refer to the sepals having a notch at the apex)

- *gemella* (Burm.f.) Hall.f.
(Latin - gemellus = twin-born, paired , refer to dichasium inflorescense)
- *hederacea* (Burm.f.) Hall.f.
(Latin - heder = hedera ; ivy , refer to resembling ivy in habit)
- *hirta* (Linn.) Merr.
(Latin - hirt = hairy , refer to plant cover with hair)
- *kingii* (Prain) Kerr
- *mammosa* (Lour.) Hall.f.
(Latin - mammosus = having large breast-like, refer to the fruits of this species have the nipple-like at the top.)
- *peltata* (Linn.) Merr.
(Greek - pelt = small shield , peltatus = armed with a shield, refer to the peltate leaves of this species)
- *quinata* (R.Br.) Ooststr. comb. nov.
(New Latin - quinat = in five or consisting of five , refer to leaves palmately compound with 5 leaflets of this species)
- *umbellata* (Linn.) Hall.f.
(Latin - umbell , umbel , umbrella = dim , a sunshade , refer to the umbelliform inflorescence of this species)
- *vitifolia* (Burm.f.) Hall.f.
(Latin - viti = a vine + Latin - foli = a leaf , refer to this species resembling the vine in leaves shape)

NEUROPELTIS Wall.

- (Latin - neuro = nerve + Latin - pelt = small shield, refer to the enlarged bract which attached to the fruit near the center and having the distinct lateral nerves.)
- *racemosa* Wall.
(Latin - racemose, refer to the raceme inflorescence of this species.)

OPERCULINA S. Manso

(Latin - opercul = a cover , lid , refer to the fruit of this genus is capsule which the upper part of epicarp more or less seperating from the lower part and from the endocarp

- petaloidea (Choisy) van Ooststr.

(Greek - petal : petaloideus = petal-like)

- riedeliana (Oliv.) van Ooststr.

- turpethum (Linn.) S. Manso

(Arabic - turbith, refer to the roots of this species containing drug.)

XENOSTEGIA Austin & Staples

- tridentata (Linn.) Austin & Staples , comb. nov.

(Greek - tri = three + Latin - dent : dentatus = toothed , refer to the apex of leaves of this species is truncate and has three indentations)
