ABSTRACT

5172006063: Polymer Science Program

Jatesuda Jirawutthiwongchai: Nano-structured Chitosan for Allergen Delivery System.

Thesis Advisors: Assoc. Prof. Suwabun Chirachanchai and Asst. Prof. Manit Nithitanakul 45 pp.

Keywords: Chitosan/ Nanoparticle/ Adjuvant/ Allergen delivery system

Nanoparticulate LCS-Phe-mPEG obtained from the conjugation of phenylalanine (Phe) and poly(ethylene glycol)methyl ether terminated with a carboxyl group (mPEG-COOH) onto low molecular weight chitosan is proposed. The structural characterization confirmed by FTIR at 1670 to 1630, 1551 to 1534, and 750 cm^{-1} for amide I, amide II, and the benzene ring of phenylalanine, respectively, and by $^1\text{H NMR}$ at 7.36 to 7.24 and 2.63 to 2.48 ppm for C_6H_5 of phenylalanine and $\text{COCH}_2\text{CH}_2\text{CO}$ of mPEG, respectively, indicates the successful reaction. Compound **2** exhibits the size of 150-250 nm in solution state, as evaluated by dynamic light scattering (DLS), and 50-60 nm in spherical shape in dry state as observed by TEM. A preliminary study of allergen entrapment done by simply mixing nanoparticles with the crude allergen solution shows a UV-Vis absorption at 595 nm, indicating the successful allergen incorporation in the nanoparticulate LCS-Phe-mPEG.

บทคัดย่อ

เจตศุตา จิรวุฒิวงษ์ชัย : โคลโคซานโครงสร้างระดับนาโนสำหรับระบบการขนส่งสารก่อภูมิแพ้ (Nano-structured Chitosan for Allergen Delivery System) อ. ที่ปรึกษา : รองศาสตราจารย์ ดร.สุวบุญ จิรชาญชัย และ ผู้ช่วยศาสตราจารย์ ดร.มานิตย์ นิธิธนากุล 45 หน้า

งานวิจัยนี้นำเสนอ อนุภาคระดับนาโน LCS-Phe-mPEG ซึ่งได้จากการเชื่อมต่อของฟีนิลอะลานีน (Phe) และพอลิเอทิลีนไกลคอลเมทิลอีเทอร์ปิดด้วยหมู่คาร์บอกซิลิก (mPEG-COOH) บนโคลโคซานน้ำหนักโมเลกุลต่ำ (LCS) การพิสูจน์ทราบทางโครงสร้างด้วยเทคนิค FTIR ที่ 1670-1630 1551-1534 และ 750 cm^{-1} สำหรับ เอไมด์ I เอไมด์ II และวงเบนซีนของฟีนิลอะลานีนตามลำดับ และด้วยเทคนิค ^1H NMR ที่ 7.36-7.24 และ 2.63-2.48 ppm สำหรับ C_6H_5 ของฟีนิลอะลานีน และ $\text{COCH}_2\text{CH}_2\text{CO}$ ของ mPEG ตามลำดับ แสดงให้เห็นถึงความสำเร็จของปฏิกิริยา เมื่อวัดขนาดอนุภาคในสถานะสารละลายด้วยเทคนิค DLS พบว่ามีขนาด 150-250 นาโนเมตร และในสถานะแห้งด้วยเทคนิค TEM มีขนาด 50-60 นาโนเมตร รูปร่างกลม สำหรับการศึกษานี้เบื้องต้นเกี่ยวกับการกักเก็บสารก่อภูมิแพ้ในอนุภาคด้วยวิธีผสมอย่างง่าย ด้วยเทคนิคการดูดกลืนแสงที่ความยาวคลื่น 595 นาโนเมตร แสดงให้เห็นถึงความสำเร็จของการกักเก็บสารก่อภูมิแพ้ในอนุภาค LCS-Phe-mPEG

ACKNOWLEDGEMENTS

The author would like to express her grateful thanks to her advisor, Assoc. Prof. Suwabun Chirachanchai, who gave her many valuable suggestions, constructive critics, inspirations, helps to strengthen her research skill and vital helps to accomplish the research.

She would like to thank her co-advisor, Asst. Prof. Manit Nithitanakul, for kind suggestion and advices.

She also wishes to thank her committees, Dr. Thanyalak Chaisuwan, Dr. Rangrong Yoksan, and Asst. Prof. Wanpen Tachaboonyakiat, for their helpful suggestions, valuable comments, and guidance.

She appreciates the scholarship from the Thailand Graduate Institute of Science and Technology (TGIST) and the collaboration project with Dr. Katanchalee Maingam from the National Metal and Materials Technology Center.

She also would like to extend her thanks to Assoc. Prof. Praneet Opanasopit (Faculty of Pharmacy, Silpakorn University) for her guidance about HPLC technique.

She is deeply indebted to Asst. Prof. Rath Pichayangkura, Head of Chitin Research Center, Chulalongkorn University for the low molecular weight chitosan.

Her deep appreciation is also to the Hitachi-High Technology Co., Ltd., Japan for the partial support of TEM instrument to SWB Laboratory.

She also would like to acknowledge the Chulalongkorn University Centenary Academic Development Project, the Petroleum and Petrochemical College, and the National Center of Excellence for Petroleum, Petrochemicals, and Advanced Materials, Thailand for the supports of this research in the College.

She would like to thank all faculties at the Petroleum and Petrochemical College who have provided knowledge and new experiences to her.

In addition, she wishes to thank her seniors and all of SWB members for the kind support in every way and giving the friendship during her research work.

Finally, the sincerest appreciation is for her family for encouragement, understanding, financial support, and love.
