## Appendix A

### Preparation of Reagents

#### 1. pH 1.2 buffer solution

Dissolve 2.0 g of sodium chloride in water

Add 7.0 ml of hydrochloric acid

Dilute with water to 1 liter, and mix

#### 2. pH 6.8 buffer solution

Dissolve 21.27g of anhydrous dibasic sodium phosphate

And dissolve 4.94 g of citric acid monohydrate in water

Dilute with water to 1 liter, and mix

สถาบันวิทยบริการ

## Appendix B

The main composition of coated pellets are polymer and core pellets that may be absorbed UV. light at the same wavelength of propranolol hydrochloride (289.0 nm), the same method of drug content determination must be proved. The absorbance value was shown in Table 18 and one outstanding characteristic was shown in Figure 180-183.

**Table 18** The absorbance value of the main compositions of coated pellets at 289.0 nm.

main compositions	sample 1	sample 2	sample 3
core lactose	0.008	0.001	0.002
coated core lactose with EURL 100	0.000	0.020	0.000
coated core lactose with EURS 100	0.000	0.000	0.000
coated core lactose with EC 100	0.000	0.000	0.000

## Appendix C

### Calibration curve

The UV absorbance at specific wavelength for each of standard concentrations of propranolol hydrochloride in acid buffer pH 1.2., phosphate buffer pH 6.8 and methanol are presented in Table 19, 20, and 21, respectively. The typical calibration curve obtained by regression analysis of these data are illustrated in Figure 184, 185, and 186, respectively.

**Table 19 Absorbance of propranolol hydrochloride in acid buffer pH 1.2 at 289.0 nm.**

Concentration (mcg/ml)	Absorbance
0	0
20	0.374
24	0.459
28	0.526
32	0.612
36	0.667
40	0.758

$$\text{Coefficient of determination} = 0.9992 \quad ; \quad y = 0 + 0.0188 x$$

## Appendix D

### Dissolution Data

The cumulative percentage of drug dissolved from uncoated pellets, propranolol hydrochloride sustained-release pellets formulation 1-39, Inderal<sup>®</sup> LA160, and three combinations formulation which duplicated dissolution in 2 mediums as acid buffer pH 1.2 and phosphate buffer pH 6.8 were presented in Table 22-38. And by pH change method, cumulative percentage of drug dissolved from Inderal<sup>®</sup> LA160 and three combinations formulation were presented in Table 39.

## Vitae

Miss Intira Coowanitwong was born on March 14, 1974 in Chulalongkorn Hospital, Bangkok. She got her degree in Bachelor of Science in Pharmacy in 1995 from Faculty of Pharmacy, Rangsit University, Bangkok, Thailand. At the present moment, she is going to study her Ph.D. in the United States of America. Her current and future degrees will be honored to Rangsit University, Chulalongkorn University, and her parents.
