APPENDICES

Appendix A Adsorption of Surfactants onto Hydrophobic Silica

The adsorption isotherms of EO/PO triblock copolymer surfactants, which are P123, L64, and 25R4, without linker molecules, with lipophilic linker molecules, and with combined linker molecules (sodium dodecyl benzene sulfonate/dodecanol) onto hydrophobic silica at 29 °C, are shown in table A1, A2, A3, A4, A5, A6, A7, A8, and A9, respectively.

Weight of silica = 0.15 g

Volume of copolymer surfactant solution = 15 ml

The adsolubilization of naphthalene in the adsorbed layer of EO/PO block copolymer surfactants, which are P123, L64, and 25R4 without linker molecules, with lipophilic linker molecules, and with combined linker molecules (sodium dodecyl benzene sulfonate/dodecanol) at 29 °C, are shown in table B19, B20, B21, B22, B23, B24, B25, B26, and B27, respectively.

Weight of silica = 0.15 g

Volume of naphthalene-surfactant solution = 15 ml

Aqueous solubility limit of naphthalene = 0.2344 mM

Table B19 The adsolubilization of naphthalene in an adsorbed layer of hydrophobic silica modified with Pluronics P123 without linker molecules at 29 °C

CURRICULUM VITAE

Name: Mr. Phongsakorn Banjai

Date of Birth: December 29, 1987

Nationality: Thai

University Education:

2006-2009 Bachelor degree of Engineering in Major of Petrochemical and Polymeric material, Faculty of Engineering and Industrial Technology, Silpakorn university, Nakorn Pathom, Thailand.

Working Experience:

2009	Position:	Internship Student
	Company name:	Khanom Gas Separation Plant
		PTT Public Company Limited.

Proceedings:

Banjai, P., Malakul, P., Nithitanakul, M., and O'Haver, J. (2012, April 24) Impact of Linker Molecules on Adsolubilization of Organic Compounds by Using Hydrophobic Silica Modified with EO/PO triblock copolymers. Proceedings of the 18th PPC Symposium on Petroleum, Petrochemicals, and Polymers, Bangkok, Thailand.

Presentations:

1. Banjai, P., Malakul, P., Nithitanakul, M., and O'Haver, J. (2012, April 24) Impact of Linker Molecules on Adsolubilization of Organic Compounds by Using Hydrophobic Silica Modified with EO/PO triblock copolymers. Poster presented at the 18th PPC Symposium on Petroleum, Petrochemicals, and Polymers, Bangkok, Thailand.
2. Banjai, P., Malakul, P., Nithitanakul, M., and O'Haver, J. (2012, May 2) Influence of Linker Molecules on Adsolubilization of Organic Compound Using Hydrophobic Silica Modified with EO/PO triblock copolymers. Poster presented at the 103rd Annual Meeting & Expo in Long Beach, California, USA.
